Introduction

In collaboration with the American Association of Colleges of Nursing (AACN), the Board of Nursing (BON) is assisting in the development of a survey to assess the current state of nursing education. The survey was designed based on the needs of the nursing profession and to address the following questions about nursing education:

- How are nursing programs currently structured?
- What are the challenges facing nursing education?
- How can we improve nursing education?

Some of the questions are at the end of the survey.

You will receive descriptive results of the nursing program. You will receive an aggregate report of the data collected from all participants.

If you are considering this for your program, please contact the BON. We are interested in any suggestions you might have as we go forward in future surveys.

Directions

Please complete the survey for each program. You will receive a PDF copy of the data. All questions are required before you can proceed to the next question. We encourage you to save the data on the PDF copy of the survey. The board will send you an email with the data. If you exit your survey, you may return to the pre-populated survey. You will be shown a summary of your responses.

send the results to your BON three weeks after the survey is completed. Please contact the BON for more information. Thank you for your participation.
